Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 Telephone: (1-613-951-3350) or to the Statistics Canada reference centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland, Labrador, Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-263-1136
Saskatchewan	1-800-667-7164
Manitoba	1-800-661-7828
Southern Alberta	1-800-882-5616
Alberta and Northwest Territories	1-800-563-7828
British Columbia and Yukon	1-800-663-1551
Telecommunications Device for the Hearing Impaired	**1-800-363-7629**
Toll-free Order-only Line (Canada and United States)	**1-800-267-6677**

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Marketing Division, Sales and Service, Statistics Canada, Ottawa, K1A 0T6.

(1-613-951-7277)
Facsimile number (1-613-951-1584)

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 téléphone: (1-613-951-3350) ou au centre de consultation de Statistique Canada à:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, **aux utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.
♾

Signes conventionnels

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada.

Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

HIGHLIGHTS

Industrial Product Price Index

In January, strong foreign demand, and a weakening of the Canadian dollar against the U.S. dollar, strengthened the economic position of export manufacturers. It resulted in the highest jump in industrial prices since 1980.

There is considerable concern in the manufacturing community over the rising prices of some inputs (including primary metals, paper products, chemicals, and plastics). Despite this, the spread of price increases continued to be slow. The prices received by a variety of consumer goods manufacturers, however, continued to accelerate.

In January, the 12-month increase in industrial prices accelerated to 9.4%. Prices jumped 1.7% from their December levels. This was the highest 12-month change since September 1981 and the highest monthly rise since October 1980. Canadian industry is seeing its highest price increases since the end of the inflationary period that was induced by the second oil crisis.

January's increases were primarily fuelled by exported goods, particularly forestry products, motor vehicles, and primary metals. The 12-month change in processed raw materials hit a record 33%. The 12-month change in other goods used mainly as inputs hit 7.5%, its highest rate since 1981.

The decline in the value of the Canadian dollar against the U.S. dollar accounted for about a fifth of January's month-to-month increase. Exchange rate movements added over one percentage point to the 12-month change in prices.

The 12-month change in Canadian industrial prices remained much higher than in the other G7 industrialized nations. It was more than 7 percentage points higher than in the United States and more than 6 percentage points higher than in Germany and the United Kingdom. Important contributors to the difference were the structure of the Canadian economy and international exchange rate movements.

FAITS SAILLANTS

Indice des prix des produits industriels

En janvier, la forte demande étrangère et la dépréciation du dollar canadien par rapport à la devise américaine ont eu pour effet de raffermir la position économique des fabricants de produits d'exportation. Le résultat de ceci est l'augmentation la plus grande des prix industriels depuis 1980.

Les fabricants ont des préoccupations considérables au sujet de la hausse des prix de certaines entrées (y compris les métaux de première transformation, les produits du papier, les produits chimiques et les produits en matière plastique). Il n'empêche que la dispersion des hausses de prix continue d'être lente. Les prix reçus par divers fabricants de biens de consommation continuent toutefois leur accélération.

En janvier, l' augmentation sur 12 mois des prix industriels s' accélère à 9,4%. Les prix ayant bondi de 1,7% par rapport à leur niveau de décembre. Il s'agissait de la plus forte variation sur 12 mois depuis septembre 1981 et de la plus forte hausse mensuelle depuis octobre 1980. L'industrie canadienne enregistre ses plus fortes hausses de prix depuis la fin de la période inflationniste qui a suivi la deuxième crise du pétrole.

Les hausses observées en janvier ont été dominées par les produits d'exportation, particulièrement les produits forestiers, les véhicules automobiles et les métaux de première transformation. La variation sur 12 mois des matières brutes transformées a atteint un record de 33%. La variation sur 12 mois d'autres biens utilisés principalement comme entrées a grimpé à 7,5%, son plus haut taux depuis 1981.

La dépréciation du dollar canadien par rapport à la devise américaine est intervenue pour environ un cinquième de la hausse d'un mois à l'autre en janvier. Les fluctuations des taux de change ont ajouté plus d'un point de pourcentage à la variation des prix sur 12 mois.

La variation sur 12 mois des prix industriels canadiens est demeurée bien plus élevée que dans les autres pays industrialisés du G7. Elle était plus de 7 points de pourcentage plus élevée qu'aux États-Unis et plus de 6 points supérieure à ce qui s'est observé en Allemagne et au Royaume-Uni. Les facteurs importants ayant contribué à la différence étaient la structure de l'économie canadienne et les fluctuations des taux de change à l'échelle internationale.

The most significant price increases were in export oriented products (motor vehicles, primary metals, pulp, and paper). Much of the increase in motor vehicle prices was due to the decline in the value of the Canadian dollar. However, a sizeable proportion was due to further price adjustments by major North American producers. Rising world demand for metal products accounted for much of the increase in non-ferrous metal prices. Contributing to the price increases for iron and steel were a strong demand for these products and the higher prices of the non-ferrous metals needed to make steel alloys. North American, European, and Asian demand continued to hike pulp and paper prices.

Les hausses de prix les plus significatives étaient observées dans les produits d'exportation (véhicules automobiles, métaux de première transformation, pâte de bois et papier). La majeure partie de la hausse des prix des véhicules automobiles était attribuable à la dépréciation du dollar canadien. Cependant, une forte proportion s'expliquait par d'autres ajustements des prix effectués par les grands producteurs nordaméricains. La hausse de la demande mondiale pour les produits métalliques était à l'origine de la majeure partie de la hausse des prix des métaux non ferreux. Les facteurs ayant contribué à la hausse des prix du fer et de l'acier ont consisté à la fois dans une forte demande pour ces produits et dans le relèvement des prix des métaux non ferreux qui entrent dans la fabrication des alliages d'acier. La demande provenant de l'Amérique du Nord, de l'Europe et de l'Asie a continué de faire grimper les prix de la pâte de bois et du papier.

Other important price increases were for chemicals and wood products. None of the main categories of industrial goods showed a decline.

D'autres hausses de prix importantes ont été observées pour les produits chimiques et les produits du bois. Aucune des grandes catégories de produits industriels n'a enregistré une baisse.

The 12-month change in the prices received by manufacturers of Canadian consumer goods continued to increase in January. It has risen from a 12-month change of about 2% in October to about 3% in January.

La variation sur 12 mois des prix reçus par les fabricants canadiens de biens de consommation a poursuivi sa progression en janvier. La variation sur 12 mois, qui avoisinait 2% en octobre, est passée à environ 3% en janvier.

Canadian exporters continue to benefit from strong world demand. Manufacturers, including those of transportation equipment and electrical products, have record order books. An increasing number of manufacturers are reporting shortages of some raw materials. These conditions may contribute to wider price increases in the near future.

Les exportateurs canadiens ont continué de profiter de la forte demande mondiale. Les carnets de commande atteignent des niveaux records chez les fabricants, y compris les fabricants de matériel de transport et de produits électriques. Un nombre croissant de fabricants signalent des pénuries de certaines matières brutes. Ces conditions peuvent contribuer à accélérer la dispersion des hausses de prix dans le proche avenir.

HIGHLIGHTS

Raw Materials Price Index

Hit by rising prices for crude oil, metals and wood, manufacturers paid a substantial 19% more for raw materials in January than they did a year ago. Raw material prices rose 4% from December.

Crude oil prices in January increased almost 8% from December. In the last few months they have been under downward pressure because of decreased demand for fuel oil (due to the mild winter) and higher than expected production from nations who are not members of the OPEC alliance. In January, this situation was reversed due to higher than expected demand, caused partially by the buoyant economic performances by the G7 industrialized nations. The mild winter apparently put more cars on the road, increasing demand for gasoline. January crude oil prices were up almost 34% compared to January 1994.

In January, natural gas prices dropped almost 5% from their December level. Natural gas prices have been weakening because of high storage volumes and mild temperatures. According to reports, certain companies will not be offering for sale some of their natural gas due to low selling prices.

In January, non-ferrous metal prices moved up almost 5% from the previous month. Major contributors to the rise were aluminum materials, copper, lead and nickel. Over the last 12 months non-ferrous metal prices jumped more than 50%.

Aluminum material prices that have surged almost 100% over the last 12 months could be subject to a less aggressive upward push in the future. Some moderating factors may dampen future price increases. They include: lower utilization of aluminum cans for soft drinks; a levelling off of aluminum in automobiles and a potential weakening or ending of the output accord between Canada and other major producers (Memo of Understanding-agreed to in Brussels, February 1994).

FAITS SAILLANTS

Indice des prix des matières brutes

Face à des prix supérieurs pour le pétrole brut, les métaux et le bois, les fabricants ont payé un substantiel 19% de plus en janvier qu'un an plus tôt. Les prix des matières brutes ont augmenté de 4% par rapport à décembre.

En janvier, les prix du pétrole brut ont augmenté de presque 8% par rapport à décembre. Un hiver doux et le dépassement des prévisions pour la production hors OPEP expliquent la pression à la baisse qu'ont subi les prix du pétrole brut au cours des derniers mois. Le renversement de la situation en janvier est notamment attribuable à une demande plus forte qu'anticipée reflétant les performances économiques soutenues du Groupe des Sept. Dans le cas du pétrole brut, le fait que l'hiver soit doux a, par contre, eu pour effet d'inciter les gens à conduire leur automobile, ce qui a entraîné une hausse de la demande d'essence. En janvier, les prix du pétrole brut ont augmenté de presque 34%, comparativement à janvier 1994.

En janvier, les prix du gaz naturel ont diminué de presque 5% par rapport au niveau atteint en décembre. Les prix du gaz naturel ont fléchi en raison des volumes élevés dans les entrepôts et de la température clémente. Selon les comptes rendus, les prix courants semblent faibles, ce qui explique que les entreprises mettent moins de volume sur le marché.

En janvier, les prix des métaux non ferreux se sont accrus de presque 5% comparativement au mois précédent. Les principaux facteurs de cette hausse sont les matières en aluminium, le cuivre, le plomb et le nickel. Au cours des 12 derniers mois, les prix des métaux non ferreux ont progressé de plus de 50%.

Il se pourrait que les prix des matières d'aluminium, qui ont effectué un bond de presque de 100% au cours des 12 derniers mois, fassent l'objet d'une tendance à la hausse moins accentuée à l'avenir. Des facteurs modérateurs pourraient atténuer les prochaines augmentations de prix. Ils incluent: l'utilisation réduite des canettes en aluminium pour les boissons gazeuses; la stabilisation de l'aluminium dans les automobiles et l'éventuel relâchement ou abolition de l'accord conclu entre le Canada et les autres producteurs principaux relativement à la production (Accord de principe accepté à Bruxelles, en février 1994).

Copper prices, the most important in the non-ferrous metal's group increased 4% over the previous month and were up almost 75% over the last 12 months. Increasing demand and time delays in bringing new supplies to market contributed to this favorable situation for copper producers.

Lead prices were up almost 8% over the previous month and more than 35% over the last 12 months. These increases were caused by low inventories and increased demand for batteries. The surge in motor vehicle sales led the way in battery sales.

Nickel prices increased almost 50% in the last three months. As a result, many stainless steel producers have imposed a surcharge for nickel onto the base price they are charging for their onto. Nickel inventories are nearly at record levels, according to LME-London Metals Exchange. This may weaken further price increases.

Wood prices moved up almost 3% in January. Compared with 12 months ago, wood prices increased 14%. The demand by pulp and lumber producers for wood has now exceeded available supply. Canadian pulp producers are buying logs from foreign markets (i.e. Alaska). Also, large integrated papermakers who previously sold excess pulp are withdrawing pulp from the market for internal use. This situation should prevail for some time as demand for paper is strong and paper inventories are low, and will eventually have to be replenished.

Prices for cattle and hogs for slaughter, which declined for most of the last quarter of 1994, recovered in January. Cattle prices moved up 6% and hogs almost 15% in January. The winter conditions in January, along with fewer animals ready for slaughter, caused a tight market, forcing prices up. However, January hog prices, even after the increase, were still almost 13% lower than the same time last year.

Les prix du cuivre, qui sont les plus importants du groupe de métaux non ferreux, ont augmenté de 4% au cours du mois précédent et de presque 75% au cours des 12 derniers mois. L'accroissement de la demande et les retards de mise en marché des nouveaux stocks ont contribué à créer une situation favorable pour les producteurs de cuivre.

Les prix du plomb ont monté de presque 8% au cours du dernier mois et de plus de 35% au cours des 12 derniers mois. Ces hausses sont attribuables à la faiblesse des stocks et à la demande accrue de batteries. Le bond effectué par les ventes de véhicules à moteur a pavé la voie pour ce qui est des ventes de batteries.

Les prix du nickel ont augmenté de presque 50% au cours des trois derniers mois. Cela explique que de nombreux producteurs d'acier inoxydable aient demandé un supplément pour le nickel qui s'ajoutait au prix de base exigés pour leurs produits. Le fait que les stocks de nickel aient atteint des niveaux presque inégalés, selon le London Metals Exchange (LME), peut atténuer d'autres augmentations de prix.

Les prix du bois ont augmenté de presque 3% en janvier. Comparativement à la même période de l'an dernier, les prix du bois se sont accrus de 14%. La demande des producteurs de pâtes et de bois de construction pour le bois en foret dépasse maintenant l'offre disponible. Les producteurs canadiens de pâte achètent des billots sur les marchés étrangers (ex: Alaska). De même. les producteurs intégrés de papier, qui précédemment vendaient leurs pâtes excédentaires, utilisent toute leur production à l'interne. Cette situation devrait prévaloir pour un certain temps, puisque la demande pour le papier est forte et que les inventaires bas devront être reconstruits.

Les prix du bétail et des porcs destinés à l'abattage, qui ont accusé une baisse pendant la majeure partie du dernier trimestre de 1994, ont remonté en janvier. En janvier, les prix du bétail ont augmenté de 6% et ceux des porcs de presque 15%. Les conditions hivernales en janvier, de même que le nombre réduit d'animaux prêts à être abattus, ont provoqué une contraction du marché, ce qui a entraîné une hausse des prix. Toutefois, même après avoir subi une hausse, les prix du porc étaient encore inférieurs, en janvier, de presque 13% à ceux de la même période de l'an dernier.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.
(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'Indice total – Tous les produits devra être considéré comme celui qui fait autorité, et l'Indice total – Toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

TABLEAU 4. Indices des prix des produits industriels par étape de transformation

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in the base period;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;
w^i	est la valeur de transaction de l'élément i au cours de la période de référence;
$P_{t/o}^i$	est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;
Σ_i	signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 $.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 $.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period o to time t;

Σ_i indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w^i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

Σ_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios),and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprend les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialities. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please, contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/ Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec l'Unité de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Bernard Lupien (613-951-9605).

MERCI DE VOTRE COMMANDE!

Statistique Canada Statistics Canada

Canada

Don't let the changing world take you by surprise!

Ne soyez pas dépassé par les événements!

An aging population. Lone-parent families. A diverse labour force. Do you know how today's social changes will affect your future ... your organization ... and your family?

Keep pace with the dramatic shifts in Canada's evolving social fabric with Statistic Canada's best-selling quarterly, ***Canadian Social Trends***. With vast and varied reports on major changes in key social issues and trends, this periodical incorporates findings from over 50 national surveys.

Written by some of Canada's leading-edge social analysts, ***Canadian Social Trends*** combines painstaking research with dynamic prose on topics like **ethnic diversity, low-income families, time-crunch stress, violent crime** and much more — all in a colourful, easy-to-read, magazine format.

A lasting record of changing times!

Join the thousands of business and policy analysts, social-science professionals, and academics who trust ***Canadian Social Trends*** to demystify the causes and consequences of change in Canadian society. Don't miss a single issue — subscribe today.

Canadian Social Trends (catalogue number 11-0080XPE) is $34 annually in Canada, US$41 in the United States and US$48 in other countries.

Le vieillissement de la population. Les familles monoparentales. La diversification de la population active. Savez-vous comment les changements sociaux d'aujourd'hui vont se répercuter sur votre avenir, votre organisation, votre famille?

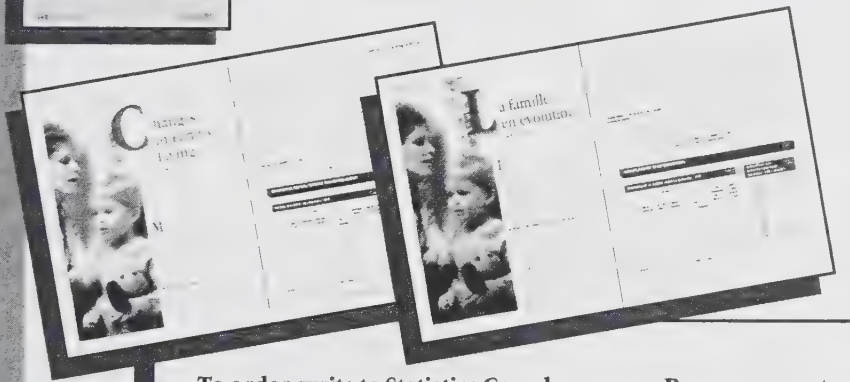

Suivez l'évolution spectaculaire de la société canadienne grâce à ***Tendances sociales canadiennes***, une publication trimestrielle de Statistique Canada. Avec des articles vastes et variés sur les principaux changements caractérisant les questions et les tendances sociales principales, cette publication intègre les résultats de plus de 50 enquêtes nationales.

Certains des analystes sociaux les plus reconnus du Canada rédigent des articles dans ***Tendances sociales canadiennes***. Ils présentent les résultats de recherches minutieuses dans un style attrayant pour des sujets tels que **la diversité ethnique, les familles à faible revenu, le stress dû au manque de temps, le crime** et bien d'autres encore dans une revue haute en couleur et de lecture aisée.

Un dossier permanent d'une époque en évolution!

Des milliers d'analystes des entreprises et des politiques, de professionnels des sciences sociales et d'universitaires lisent ***Tendances sociales canadiennes*** pour identifier les causes et les conséquences de l'évolution de la société canadienne. Ne manquez pas un numéro, abonnez-vous dès aujourd'hui.

L'abonnement annuel à ***Tendances sociales canadiennes*** (n° 11-0080XPF au catalogue) coûte 34 $ au Canada, 41 $ US aux États-Unis et 48 $ US dans les autres pays.

To order, write to Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Pour passer votre commande, écrivez à Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au centre de services-conseils de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication.

Vous pouvez aussi envoyer votre commande par télécopieur, au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et donner votre numéro de carte VISA ou MasterCard.

✔ Identify Emerging Trends

✔ Define New Markets

✔ Pinpoint Profit Opportunities

To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the ***Market Research Handbook*** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
- the level of sales in retail chain and department stores;
- what goods are being traded between Canada, U.S., and other countries;
- census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration

...and much, much more!

With over 600 pages, the ***Handbook*** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the ***Market Research Handbook*** (Catalogue #63-2240XPB) today for only $110 in Canada plus $7.70 GST, US$132 in the United States, and US$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 **OR FAX** (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A OT6, or contact the nearest Statistics Canada Regional Office listed in this publication.

✔ Dégagez les nouvelles tendances

✔ Définissez les nouveaux marchés

✔ Déterminez les possibilités de profit

Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le ***Recueil statistique des études de marché*** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
- le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
- les biens échangés entre le Canada, les É.-U. et d'autres pays;
- les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale

...et bien plus encore!

Le ***Recueil***, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du ***Recueil statistique des études de marché*** (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 $ au Canada plus 7,70 $ de TPS, 132 $ US aux États-Unis et 154 $ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 Telephone: (1-613-951-3350) or to the Statistics Canada reference centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 téléphone: (1-613-951-3350) ou au centre de consultation de Statistique Canada à:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

.. figures not available.

... figures not appropriate or not applicable.

– nil or zero.

-- amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres non disponibles.

... n'ayant pas lieu de figurer.

– néant ou zéro.

-- nombres infimes.

r nombres rectifiés.

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

HIGHLIGHTS

Industrial Product Price Index

In February, industrial product prices rose 8.8% from a year earlier, down from January's 12-month increase of 9.7%, which was the highest annual jump since September 1981.

The change from January to February was 0.2%, the lowest monthly increase in five months. Despite the low monthly increase , prices for pulp, paper and aluminum continued to rise, joined by meat prices which jumped 4.6%.

Despite declines in certain areas such as automobile and construction, demand remained generally healthy in February for pulp, paper, and paper products. Both Canadian and American firms are operating at or near full capacity and only moderate increases in capacity are expected in both countries in 1995.

In February, there were declines in the prices of many non-ferrous metals other than aluminum. Copper prices appear to have experienced a plateau where further price change is undergoing study even though demand appears reasonably strong. Nickel, in a surplus supply position to meet apparent demand, may have already seen prices peak at least for the short term. Zinc, lead and tin prices were also down as interest rate levels affected residential construction and automobile sales in both Canada and the United States.

Events in construction and automobile sales also seem to have affected both automobile and lumber prices. In the Canadian automotive sector, both export and domestic prices edged down in February. Although still at relatively high levels historically, lumber, sawmill and other wood product prices moved down slightly.

The value of the US dollar against the Canadian dollar edged down by about a half percentage between January 15 and February 15. This reduced the month-to-month increase in industrial prices from about 0.3% to 0.2%.

FAITS SAILLANTS

Indice des prix des produits industriels

En février, le prix des produits industriels a augmenté de 8,8% par rapport à un an plus tôt. En janvier, cette augmentation était de 9,7%, la variation sur 12 mois le plus élevée depuis septembre 1981.

La variation entre janvier et février est de 0,2%, ce qui en fait la hausse mensuelle la plus faible des cinq derniers mois. Malgré cela, le prix de la pâte de bois, du papier et de l'aluminium continue d'augmenter, tandis que celui de la viande s'accroît de 4,6%.

En dépit de diminutions dans des secteurs tels que l'automobile et la construction, la demande reste en général vigoureuse en février dans le cas de la pâte de bois, du papier et des produits du papier. Les entreprises canadiennes et américaines fonctionnent à pleine capacité, ou presque, et on ne s'attend qu'à des augmentations modérées de la capacité dans les deux pays en 1995.

En février, le prix d'un grand nombre de métaux non ferreux autres que l'aluminium diminue. Le prix du cuivre semble s'être stabilisé à un niveau auquel d'autres variations de prix sont à l'étude, même si la demande semble être raisonnablement forte. Le prix du nickel, dont l'offre pour répondre à la demande apparente est excédentaire, semble avoir atteint un sommet, au moins à court terme. Celui du zinc, du plomb et de l'étain est lui aussi en baisse, car les taux d'intérêt se sont répercutés sur la construction résidentielle et les ventes d'automobiles au Canada et aux États-Unis.

Les événements dans les secteurs de la construction et des ventes automobiles semblent avoir également touché les prix des automobiles et du bois de construction. Dans le secteur canadien de l'automobile, les prix à l'exportation et domestique se replient en février. Bien que toujours à des niveaux relativement élevés sur le plan historique, le prix du bois de construction, des produits de scierie et d'autres produits du bois diminue légèrement.

La valeur du dollar américain par rapport au dollar canadien se replie de 0,5% environ entre le 15 janvier et le 15 février. L'augmentation d'un mois à l'autre passe ainsi de 0,3% environ à 0,2%.

The decline in the 12-month change in Canadian industrial prices, combined with the slow increase in producer prices in the other members of the G7 group of industrialized nations, went a little way towards closing the differences in industrial price inflation between Canada and the other G7 countries. According to February figures, the 12-month change in Canadian producer prices edged down to about 7 percentage points higher than in the United States and about 5.5 percentage points higher than in Germany and the United Kingdom. The different structure of the Canadian economy (i.e., resource based), and international exchange rate movements, account for much of the difference in the rates of producer price changes.

La baisse de la variation sur douze mois des prix industriels canadiens, et la lente augmentation des prix à la production des autres pays membres du G7, a contribué un peu à réduire les différences dans l'inflation des prix industriels entre le Canada et les autres pays du G7. D'après les chiffres de février, la variation sur douze mois des prix à la production canadiens diminue et ne dépasse ainsi que de 7 points environ celle des États-Unis et de 5,5 points celle de l'Allemagne et du Royaume-Uni. La plus grande partie de la différence entre les taux de variation des prix à la production s'explique principalement par la différence de structure de l'économie du Canada (ressources naturelles) et les fluctuations internationales du taux de change.

In February, the most important price increases were in meat products, pulp, paper, and commercial printing. Meat product prices were up 4.6% as the results of increases in pork and beef prices. These increases were seasonal and followed several months of advances in swine and beef cattle prices. Pulp prices were up 3.3%, domestic newsprint prices were up 2.9%, and commercial printing prices were up 2.3%.

En février, les augmentations les plus importantes sont le prix des produits de la viande, de la pâte de bois, du papier et de l'impression commerciale. Le prix des produits de la viande s'accroît de 4,6%, en raison de la majoration de celui du porc et du boeuf. Il s'agit d'augmentations saisonnières, qui surviennent après plusieurs mois de hausses du prix des porcs et des bovins. Le prix de la pâte de bois augmente de 3,3%, celui du papier journal canadien, de 2,9%, et celui de l'impression commerciale, de 2,3%.

Partly offsetting these increases, were price decreases for some chemicals and for a considerable range of food and feed items. The most important decreases amongst chemicals were for ethylene and oxygen. Amongst food and feed items, lower prices included refined sugar, coffee products, oil meals and oil cakes, and some frozen vegetable prices.

Ces augmentations sont en partie compensées par une baisse du prix de certains produits chimiques et d'un grand nombre d'aliments de consommation et d'aliments pour animaux. Pour les produits chimiques, les baisses les plus fortes sont celles de l'éthylène et de l'oxygène. En ce qui concerne les aliments de consommation et les aliments pour animaux, on signale une diminution du prix du sucre raffiné, des produits du café, des tourteaux et farines, ainsi que de certains légumes surgelés.

Although the 12-month change in industrial prices slowed in February, this could well be temporary. The world economy is continuing to expand. The demand for processed raw materials, which has been fuelling the increase in Canadian industrial prices, is likely to continue to grow in the near future. Nevertheless, uncertainty in North American auto sales, and possible increases in United States and Canadian interest rates, may slow North American growth, and Canadian industrial price increases, as the year progresses.

En dépit d'un ralentissement de la variation sur douze mois en février, celuici pourrait être temporaire. L'économie mondiale continue de croître. La demande de matières brutes transformées, qui alimentait la hausse des prix industriels canadiens, devrait se poursuivre à court terme. Mais l'incertitude qui entoure les ventes d'automobiles en Amérique du Nord et d'éventuelles hausses des taux d'intérêt aux États-Unis et au Canada pourraient freiner la croissance en Amérique du Nord et les hausses des prix industriels canadiens dans le courant de l'année.

HIGHLIGHTS

Raw Materials Price Index

Raw material prices increased 0.8% in February after increasing 4.1% in January. Lower metal prices greatly offset higher prices for crude oil, hogs and wood. Raw material prices were up 17% on an annual basis, compared with January's 12-month change (+19%).

The potential for economic slowdown, particularly in North America, has pulled metal prices down. Recent interest rate increases affected most levels of economic activity (i.e., construction, automobiles, telecommunications), thereby lessening the demand for metals. Sales in the automobile industry were down 7 per cent from a year earlier. In February, non-ferrous metal prices declined almost 4 per cent after increasing more than 65% over the last 14 months. The main exception to the February decline in metal prices was aluminum materials which were up 3%. Even though copper, zinc, lead and nickel prices fell in February, most mines reported operating at capacity. Continuing price strength for industrial metals is dependent on inventory levels and global economic activity. Present inventories for aluminum, nickel, lead and zinc appear to be in a surplus position, with copper inventories on the tight side.

Crude oil prices moved up almost 3% in February. Compared to 12 months earlier, prices were 35% higher. Future price levels of crude oil are dependent on global demand, supply management by OPEC, non-OPEC output, and, most recently, the possibility that Iraq might resume selling crude on the world market.

World oil consumption is now somewhere near 70 million barrels per day. According to reports, Iraq would initially supply at most one million barrels a day, and within 3 to 4 years their contribution would be somewhere around 3 to 4 million barrels per day. The US and the previous USSR , once the two largest oil producing countries, now produce 13 million barrels per day from the 21 million barrels in 1986-88. Iran is presently producing 3

FAITS SAILLANTS

Indice des prix des matières brutes

Après avoir augmenté de 4,1% en janvier, les prix des matières brutes ont diminué pour se fixer à 0,8% en février. Le recul des prix des métaux a bien compensé la hausse des prix du pétrole brut, des porcs et du bois. Les prix des matières brutes ont progressé de 17% pour les douze derniers mois, comparativement à la variation sur 12 mois de janvier (+19%).

L'éventuel ralentissement économique, surtout en Amérique du Nord, a entraîné une diminution des prix des métaux. Les hausses récentes des taux d'intérêt ont influé sur la plupart des niveaux d'activité économique (ex. la construction, les automobiles, les télécommunications), ce qui cause le fléchissement de la demande de métaux. Dans le secteur de l'automobile, les ventes se sont repliées de 7%, comparativement au niveau atteint un an plus tôt. En février, les prix des métaux non ferreux ont fléchi de presque 4%, après avoir augmenté de plus de 65% au cours des 14 derniers mois. Les prix des matières d'aluminium, qui ont augmenté de 3%, constituent la principale exception au repli des prix des métaux enregistré en février. En dépit de la baisse des prix du cuivre, du zinc, du plomb et du nickel en février, la plupart des mines ont déclaré qu'elles fonctionnaient à capacité. La vigueur soutenue des prix des métaux industriels dépend des niveaux des stocks et de l'activité économique globale. À présent, les stocks d'aluminium, de nickel, de plomb et de zinc semblent être en excédent, tandis que les stocks de cuivre sont limités.

Les prix du pétrole brut se sont accrus de presque 3% en février. Ils sont supérieurs de 35% à ceux de février 1994. Les futurs niveaux des prix du pétrole brut dépendent des conditions de la demande globale, de même que de la gestion des approvisionnements de l'OPEP, de la production des autres pays et, plus récemment, de la possibilité que l'Iraq recommence à vendre du pétrole brut sur le marché mondial.

La consommation mondiale du pétrole s'établit maintenant à près de 70 millions de barils par jour. Selon les rapports, l'Iraq fournirait au début pas plus qu'un million de barils par jour et, trois ou quatre ans plus tard, environ 3 à 4 millions de barils par jour. Les États-Unis et l'ancienne U.R.S.S., jadis les deux plus importants pays producteurs de pétrole, produisent maintenant 13 millions de barils par jour, comparativement à 21 millions de barils en 1986-1988. À l'heure actuelle, l'Iran produit chaque mois 3 millions de barils de

million barrels a month short of its quota. Most likely, many OPEC countries could produce beyond their quota levels. As well, non-OPEC countries have unused capacity. Any sudden and sustained world industrial expansion, at least in the short term, would probably put upward pressure on crude oil prices.

Wood prices increased almost 4% in the first two months of 1995, after doubling from 1986 to 1994. Wood prices have continuously pushed forward due to world demand for logs and pulpwood. Some of the shortfall in the supply of logs can be explained to some extent by the closing of many logging areas due to wet weather. The supply situation should improve as forests dry out in the spring and summer. Wood prices have increased even though residential construction was down in Canada and the US. Higher stumpage fees, more stringent forest management, recent increased demand for pulp and strong foreign markets for wood would tend to maintain prices at least at their current level.

Hog prices were up almost 30% in the first 2 months of 1995, after declining by more than 20% in the last quarter of 1994. As the spring season approaches, more hogs should be brought to market, so prices may level off.

Among other notable raw material price changes, natural gas was down 11% in January and February 1995. February's monthly changes showed increases for natural rubber (+7%), raw tobacco (+4%), corn (+5%), canola (+3%) and fish (+4%).

moins que son quota. Très probablement, la production de nombreux pays de l'OPEP pourrait atteindre des niveaux supérieurs à leurs quotas. En outre, les autres pays possèdent des capacités non utilisées. Toute expansion industrielle mondiale soudaine et soutenue exercerait vraisemblablement, du moins à court terme, une pression à la hausse sur les prix du pétrole brut.

Les prix du bois, qui ont doublé de 1986 à 1994, se sont accrus de presque 4% au cours des deux premiers mois de 1995. Les prix du bois ont constamment progressé en raison de la demande mondiale de billots et de pâte de bois. Une partie de l'insuffisance d'approvisionnement en billots peut s'expliquer, dans une certaine mesure, par la fermeture de nombreux cantons en raison de la pluie. En ce qui a trait à l'approvisionnement, la situation devrait s'améliorer dès que les forêts s'assécheront au printemps et à l'été. Les prix du bois ont augmenté, en dépit de la baisse de la construction résidentielle au Canada et aux États-Unis. La hausse des droits de coupe, l'aménagement plus rigoureux des forêts, l'accroissement récent de la demande de pâte de bois et la vigueur des marchés étrangers du bois contribueront à maintenir les prix au moins à leur niveau actuel.

Les prix du porc se sont accrus de presque 30% au cours des deux premiers mois de 1995, après avoir diminué de plus de 20% au dernier trimestre de 1994. Avec la venue du printemps, un plus grand nombre de porcs seront amenés sur le marché, ce qui pourrait avoir pour effet de stabiliser les prix.

Au nombre des autres variations notables des prix des matières brutes, mentionnons le gaz naturel, en baisse de 11% au cours de la période allant de janvier à février 1995. Parmi les variations mensuelles de février, on constate des hausses du caoutchouc naturel (+7%), du tabac brut (+4%), du maïs (+5%), du canola (+3%) et du poisson (+4%).

(1) These indexes are preliminary.
(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'Indice total – Tous les produits devra être considéré comme celui qui fait autorité, et l'Indice total – Toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

Σ_i indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

Σ_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 $.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 $.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in 1986;
$P_{t/o}^{i}$	is the price index for element i, meaning its price change from the base period o to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;
w^i	est la valeur de transaction de l'élément i en 1986;
$P_{t/o}^{i}$	est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;
Σ_i	indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios),and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprend les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialities. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please, contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/ Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec l'Unité de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Bernard Lupien (613-951-9605).

Hire our team of researchers for $56 a year

Notre équipe de chercheurs est à votre service pour 56 $ par année

Subscribing to ***Perspectives on Labour and Income*** is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But ***Perspectives*** is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analyzing the statistics to bring you simple, clear summaries of labour market and income trends.

Our team of experts brings you the latest labour and income data. Each quarterly issue provides:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research
- information on new surveys

As a special bonus, twice a year you will also receive ***The Labour Market Review***, giving you timely analysis on labour market performance over the previous six months or year.

And all for only $56!

Thousands of Canadian professionals turn to ***Perspectives*** to discover emerging trends in labour and income and to stay up to date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find ***Perspectives*** indispensable. GUARANTEED. If you aren't convinced after reading the first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to ***Perspectives*** today (Cat. No. 75-0010XPE).

ORDER NOW!

For only $56 (plus $3.92 GST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US$68 for U.S. customers and US$80 for customers in other countries. Fax your VISA or MasterCard order to: **(613) 951-1584.** Call toll free: **1-800-267-6677.** Or mail to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Ave., Ottawa, Ontario K1A 0T6. Or contact your nearest Statistics Canada Reference Centre listed in this publication.

S'abonner à ***L'emploi et le revenu en perspective***, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les tendances actuelles du marché du travail et des revenus.

Notre équipe de spécialistes met à votre disposition des données récentes sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez :

- des articles de fond sur l'emploi et le revenu
- plus de 50 indicateurs clés de l'emploi et du revenu
- un aperçu de la recherche en cours
- de l'information sur les nouvelles enquêtes

En prime, vous recevrez le ***Bilan du marché du travail*** deux fois l'an. Vous disposerez ainsi d'une analyse à jour de la situation du marché du travail pour les six derniers mois ou la dernière année.

Tout cela pour 56 $ seulement!

Des milliers de professionnels au Canada consultent ***Perspective*** pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que ***L'emploi et le revenu en perspective*** deviendra pour vous un outil indispensable. C'EST GARANTI. Si vous n'êtes pas satisfait après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à ***Perspective*** (n° 75-0010XPF au cat.) dès aujourd'hui.

ABONNEZ-VOUS DÈS MAINTENANT!

Pour 56 $ seulement (TPS de 3,92 $ en sus), vous recevrez les plus récentes recherches sur l'emploi et le revenu (quatre numéros par année). L'abonnement est de 68 $ US aux États-Unis et de 80 $ US dans les autres pays. Faites parvenir votre commande par télécopieur (VISA ou MasterCard) au **(613) 951-1584**, par téléphone (sans frais) au **1-800-267-6677**, par courrier à Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6. Ou communiquez avec le Centre de consultation de Statistique Canada le plus près. (Voir la liste dans la présente publication).

✔ Identify Emerging Trends

✔ Define New Markets

✔ Pinpoint Profit Opportunities

To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the ***Market Research Handbook*** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
- the level of sales in retail chain and department stores;
- what goods are being traded between Canada, U.S., and other countries;
- census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration

...and much, much more!

With over 600 pages, the ***Handbook*** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the ***Market Research Handbook*** (Catalogue #63-2240XPB) today for only $110 in Canada plus $7.70 GST, US$132 in the United States, and US$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 **OR FAX** (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A OT6, or contact the nearest Statistics Canada Regional Office listed in this publication.

✔ Dégagez les nouvelles tendances

✔ Définissez les nouveaux marchés

✔ Déterminez les possibilités de profit

Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le ***Recueil statistique des études de marché*** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
- le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
- les biens échangés entre le Canada, les É.-U. et d'autres pays;
- les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale

...et bien plus encore!

Le ***Recueil***, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du ***Recueil statistique des études de marché*** (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 $ au Canada plus 7,70 $ de TPS, 132 $ US aux États-Unis et 154 $ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 Telephone: (1-613-951-3350) or to the Statistics Canada reference centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Section des industries de biens et de services,
Division des prix,

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

HIGHLIGHTS

Industrial product price index

Industrial prices in March rose 9.3% from a year earlier, the same rate of increase as the revised February figure. The March level was down from the 14 year peak of 10% in January.

The strong price increases primarily remained confined to the pulp and paper sector which accounted for over half of the monthly 0.6% rise in industrial prices between February and March. Other industrial sectors, including machinery and electrical equipment, were beginning to report increases, which were attributed to current high prices for processed raw materials.

The weakening Canadian dollar accounted for 30% of March's increase in the industrial price level.

Over half of the 0.6% increase in industrial prices in March was due to domestic and export price increases in pulp and paper products. Other significant contributors were exported motor vehicles, chemicals, and printing. Declines in primary metal prices partly offset price increases.

Strong demand caused newsprint prices to soar 8.3% and pulp prices to jump 6.0% in March, while plants operated at or near full capacity. As world demand increases, both Asia and the European Union provide growing markets for Canadian producers of pulp and paper products. Recent currency movements can only make Canadian producers even more competitive in these export markets.

In contrast to pulp and paper products, the prices for sawmill and other wood product prices edged down somewhat as residential construction, affected by recent interest rate levels, remained relatively weak in both the United States and Canada.

FAITS SAILLANTS

Indice des prix des produits industriels

En mars, les prix industriels ont grimpé de 9,3% par rapport à il y a un an, soit un taux d'augmentation identique au chiffre révisé de février. La progression en mars est en baisse par rapport à janvier alors qu'elle était de 10%, la plus élevée en 14 ans.

Les fortes hausses de prix restent confinées principalement au secteur des pâtes et papiers, qui explique plus de la moitié de la progression mensuelle de 0,6% des prix industriels entre février et mars. D'autres secteurs industriels, notamment les machines et le matériel électrique, commencent aussi à afficher des hausses de prix attribuables à la cherté actuelle des matières brutes traitées.

La dépréciation du dollar canadien explique 30% de l'augmentation du niveau des prix industriels en mars.

Plus de la moitié de l'augmentation de 0,6% des prix industriels en mars est due à la majoration des prix domestiques et à l'exportation des produits des pâtes et papier. Les véhicules automobiles exportés, les produits chimiques et les produits de l'impression ont également exercé un effet d'entraînement important. Ces augmentations de prix ont été contrebalancées en partie par la diminution des prix des produits métallique primaires.

En mars, une forte demande a gonflé les prix du papier journal de 8,3% et ceux des pâtes de bois, de 6,0%, les usines tournant à pleine capacité ou presque. L'accroissement de la demande mondiale a élargi les marchés des producteurs canadiens de pâtes et papiers, tant en Asie que dans les pays de l'Union européenne. Les mouvements récents de la valeur des devises ne peuvent que renforcer la position concurrentielle des producteurs canadiens aux marchés des exportations.

Contrairement aux pâtes et papiers, les prix des produits de scierie et des autres produits du bois ont fléchi quelque peu, la construction résidentielle restant plutôt faible aux États-Unis comme au Canada en raison du niveau récent des taux d'intérêt.

Declines in aluminum product prices (-4.7%) and nickel products (-13.1%) pulled down the level of primary metal prices. Copper product prices, which underwent a correction in February, recovered 3.0%. The price declines for aluminum and nickel seem to be related to the activities of investment funds, and the presence of significant stocks. However, world demand for non-ferrous metals remains strong. Also, regarding products with an important metal content, respondents reported the price of steel was responsible for a number of price increases.

Le recul des prix des produits de l'aluminium (4,7%) et du nickel (-13,1%) a fait baisser le niveau des prix des produits métalliques primaires. Les prix des produits du cuivre, qui ont fait l'objet d'une correction en février, ont gagné 3,0%. La baisse de prix dans le cas de l'aluminium et du nickel semble liée aux activités touchant les fonds de placement et au niveau élevé des stocks. Toutefois, la demande mondiale de métaux non ferreux reste ferme. Par ailleurs, pour ce qui est des produits à contenu métallique élevé, les répondants ont déclaré que la majoration de l'acier expliquait un certain nombre de hausses de prix.

Chemical prices were up 1.0% in March. Ethylene and ammonia accounted for much of the increase. Ethylene prices followed the movement of natural gas prices. The ammonia increase came as plants ran at full capacity and market conditions for nitrogen fertilizers remained good.

Les prix des produits chimiques ont augmenté de 1,0% en mars. L'éthylène et l'ammoniaque ont compté pour beaucoup dans l'augmentation. Les prix de l'éthylène se sont alignés sur le mouvement des prix du gaz naturel. La hausse dans le cas de l'ammoniaque a été observée alors que les usines tournait à pleine capacité et que les conditions du marché restaient favorables pour les engrais azotés.

Between February 15 and March 15, the value of the U.S. dollar against the Canadian dollar rose by a little under 1%. This accounted for almost 30% of the 0.6% increase in industrial prices in March. Virtually all the increase in motor vehicle prices was due to the effect of the exchange rate on prices quoted in U.S. dollars.

Entre le 15 février et le 15 mars, le dollar américain s'est apprécié d'un peu moins de 1% visàvis du dollar canadien. Cela explique près de 30% de l'augmentation de 0,6% des prix industriels en mars. La quasitotalité de la hausse des prix des véhicules automobiles est due à l'effet du taux de change sur les prix indiqués en dollars américains.

The 12-month increase in Canadian industrial prices remains the highest among the G7 nations. The increase is about 7.5 percentage points higher than in the United States and a little under six percentage points higher than in Germany and the United Kingdom. The different structure of the Canadian economy and international exchange rate movements account for much of the difference in the rates of change in producer price changes. Canada produces and exports large quantities of certain key processed raw materials. Canadian manufacturers have benefited from prices quoted in currencies appreciating against the Canadian dollar.

De tous les pays industrialisés membres du G7, le Canada reste celui où les prix industriels ont le plus augmenté sur douze mois. L'augmentation au Canada dépasse de quelque 7,5 points celle observée aux ÉtatsUnis, et d'un peu moins de six points celles enregistrées en Allemagne et au RoyaumeUni. La structure différente de l'économie canadienne, et les mouvements des taux de change à l'échelle internationale, expliquent en grande partie l'écart dans les taux de variation des prix aux producteurs. Le Canada produit et exporte de grandes quantités de certaines matières brutes essentielles. Les producteurs canadiens ont profité des prix exprimés en monnaies dont la valeur est en hausse visàvis du dollar canadien.

In March, the 12-month change in the prices received by manufacturers of Canadian consumer goods dropped to less than 1% higher than the 12-month change in the prices paid by consumers to retailers. The 12-month change in the consumer price index for goods, 2.1%, reached its highest level since early 1993. (About half of what the

En mars, la variation sur douze mois des prix reçus par les fabricants canadiens de produits de consommation dépasse de moins de 1% la variation sur douze mois des prix payés aux détaillants par les consommateurs. La variation sur douze mois de l'indice des prix à la consommation pour les biens, soit 2,1%, est la plus élevée depuis le début de 1993. (La moitié environ de ce que paie le consommateur revient

consumer pays goes to manufacturers. The rest is divided between retailers, wholesalers, indirect taxes, and transporters).

Signs of weakness in the Canadian and American automotive market, and the effect of the decline in housing starts in the two countries, probably contributed to the uncertainty in some industrial prices. February's initial decline in the 12-month increase in industrial prices from 10% to 9.3% coincided with declines in manufacturing shipments, in exports, and in imports according to recent Statistics Canada figures. However, the world economy remains strong. Widespread increases in the prices of processed raw materials may resume as demand rises in Europe and Asia. In addition, the current high level of prices for these materials is beginning to have some ripple effects on other prices.

au fabricant. Le reste est partagé entre le détaillant, le grossiste, les taxes indirectes et le transporteur.)

Les signes d'essoufflement des marchés canadien et américain de l'automobile, et les répercussions de la diminution du nombre de mises en chantier dans les deux pays, ont sans doute contribué à l'instabilité de certains prix industriels. Le ralentissement initial en février de l'augmentation sur douze mois des prix industriels, qui est passée de 10% à 9,3%, a coïncidé avec le recul des livraisons de produits fabriqués, des exportations et des importations, selon les chiffres récents de Statistique Canada. Toutefois, l'économie mondiale reste vigoureuse. De nouvelles augmentations générales des prix des matières brutes traitées pourraient fort bien se produire en raison de la hausse de la demande en Europe et en Asie. En outre, le niveau élevé des prix de ces matières à l'heure actuelle commence à se répercuter sur d'autres prix.

NOTE TO USERS

The Industrial Product Price Index (IPPI) reflects the prices that producers receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index (CPI), the IPPI excludes indirect taxes and all the costs that occur between the time when a good leaves the plant and the time when the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. These producers often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Rises or falls in the value of the Canadian dollar against the US dollar will therefore affect the IPPI. A 1.0% change in the value of the Canadian dollar against the US dollar has been estimated to change the IPPI by approximately 0.2%.

NOTES AUX UTILISATEURS

L'indice des prix des produits industriels (IPPI) retrace les prix que les producteurs reçoivent au moment où les produits franchissent les portes de l'usine. Il ne retrace pas ce que le consommateur paie. Contrairement à l'indice des prix à la consommation (IPC), l'IPPI exclut les impôts indirects et tous les coûts qui surviennent entre le moment où un produit sort de l'usine et le moment où l'utilisateur final en prend possession, ce qui comprend les coûts du transport, du commerce de gros et du commerce de détail.

Les producteurs canadiens exportent beaucoup de biens. Ils vont souvent indiquer leurs prix en devises étrangères, en particulier dans le cas des véhicules automobiles, des pâtes de bois, du papier et des produits du bois. Les fluctuations de la valeur du dollar canadien par rapport à la devise américaine se répercuteront par conséquent sur l'IPPI. Une variation de 1,0% de la valeur du dollar canadien par rapport au dollar US devrait, selon les estimations, se traduire par une variation de 0,2% de l'IPPI.

HIGHLIGHTS

Raw materials price index

Raw material prices increased 0.5% in March. Higher prices for wood and crude oil were partially offset by lower prices for cattle, hogs and wheat. The 12-month increase of raw material prices has been increasing at the rate of almost 17% from December 1994 to March 1995.

Even though lumber prices may be starting to wane, prices for logs and particularly pulpwood have remained strong. In March, prices for logs and pulpwood were up 1% and 4% respectively. Over the last 12 months, log prices increased 12% and pulpwood prices more than 20%. World demand for newsprint and fine paper has been responsible for recent increases in wood prices. Since March 1994, lumber, sawmill and other wood product prices increased only 0.6% compared with more than 36% for paper and paper products. The strong demand for pulp has caused lower grade logs to be converted to pulp rather than to lumber in an attempt to satisfy the shortage of chips for pulpmills. In British Columbia, the shortage of logs has caused sawmills and pulpmills to import logs from other provinces, the Yukon, northern U.S. states, and Alaska. One report noted that wood chips from as far away as Chile were being considered as a source of supply. Strong worldwide demand for paper and paper products combined with a shortage of capacity has driven up prices over the last 12 months. This situation is expected to continue for at least the coming year.

Crude oil prices edged up almost 1% in March after increasing moderately since January 1995. Compared with 12-months earlier, crude oil prices were up more than 35%. Crude oil prices continued to increase due to supply problems in the North Sea and Venezuela. At the same time, renewed tensions between Iraq and the United Nations and the United States will probably not allow Iraq to add to the world supply of oil in the near future.

Animals and animal product prices declined slightly more than 1% from the level in February. Lower prices for cattle and hogs more than offset the slightly higher prices for industrial unprocessed milk. Compared with February, cattle prices were down more than 4% and hog prices were

FAITS SAILLANTS

Indice des prix des matières brutes

Les prix des matières brutes ont augmenté de 0,5% en mars. Le recul des prix des bovins, des porcs et du blé a contrebalancé, en partie du moins, la hausse des prix du bois et du pétrole brut. Les prix des matières brutes ont progressé, sur une période de douze mois, à un taux de presque 17% entre décembre 1994 et mars 1995.

Même si les prix du bois d'oeuvre pourraient bien commencer à fléchir, le prix des billes et du bois à pâte s'est maintenu à un niveau élevé. En mars, les prix des billes et du bois à pâte augmentaient de 1% et de 4% respectivement. Au cours des douze derniers mois, les prix des billes et du bois à pâte ont progressé de 12% et de plus de 20% respectivement. La demande mondiale de papier journal et de papier fin explique la progression récente des prix du bois. Depuis mars 1994, le prix des sciages, produits de scierie et divers n'a augmenté que de 0,6% comparativement à plus de 36% pour le prix du papier et des produits du papier. La forte demande de pâte a incité les forestières à transformer les billes de qualité inférieure en pâte plutôt qu'en bois d'oeuvre pour tenter de contrer la pénurie de copeaux dans les usines de pâtes et papier. En Colombie-Britannique, la pénurie de billes a obligé les scieries et les usines de pâtes et papier à s'approvisionner dans d'autres provinces, au Yukon, dans les états du nord des États-Unis et en Alaska. Dans un rapport, on indique qu'on envisage même d'importer des copeaux de bois de sources comme le Chili. La forte demande mondiale de papier et de produits du papier, conjuguée à une insuffisance de la capacité de production, a poussé les prix à la hausse au cours des douze derniers mois. Cette situation devrait se maintenir au moins pendant l'année à venir.

Les prix du pétrole brut ont augmenté de près de 1% en mars après avoir connu une hausse modérée depuis janvier 1995. Les prix du pétrole brut étaient supérieurs de plus de 35% aux prix de ce produit à la même période l'an dernier. Les prix du pétrole brut ont continué leur ascension en mars en raison de problèmes d'approvisionnement dans la Mer du Nord et au Venezuela. En outre, les nouvelles tensions entre l'Iraq, les Nations Unis et les États-Unis ne permettront probablement pas à ce pays de fournir davantage de pétrole sur le marché mondial dans un avenir rapproché, du moins.

Les prix des animaux et des substances animales ont fléchi, soit d'un peu plus de 1% par rapport à février. La chute des prix des bovins et du porc a largement compensé la légère augmentation des prix du lait industriel non transformé. Comparativement à février, les prix des bovins étaient inférieurs de plus de 4% et ceux du porc, de 6%. Au cours des

down more than 6%. Over the last 12 months (to March), cattle prices declined 5% and hog prices have dropped 12%. This weakening of prices has been caused by the strong supply of available animals. High levels of meat in storage in the U.S. have also dampened export prices for Canadian cattle and hogs.

douze derniers mois, les prix des bovins ont chuté de 5% et ceux des porcs, de 12%. Ce fléchissement des prix est attribuable à la grande quantité d'animaux sur le marché. L'existence d'un inventaire important de viande aux États-Unis a aussi fait baisser les prix à l'exportation des bovins et des porcs canadiens.

Vegetable product prices increased 1.5% from February. Higher prices for coffee, canola, barley and rubber offset lower wheat prices. Coffee prices increased moderately due to dry weather in Columbia and a shortfall in the Brazilian production forecast. Canola prices were up almost 4% from February, partly due to the lower Canadian dollar vis à vis the Japanese yen. These increases were partly offset by lower wheat prices (-2%). Expectations of good U.S. wheat crops contributed to lower Canadian wheat prices.

En mars, les prix des substances végétales ont augmenté de 1,5% par rapport à février. La hausse des prix du café, du canola, de l'orge et du caoutchouc a neutralisé la baisse des prix du blé. Les prix du café ont augmenté de façon modérée en raison du temps sec qu'a connu la Colombie et de l'écart négatif entre la production réelle et la production prévue au Brésil. Les prix du canola ont progressé de près de 4% en mars comparativement à février, hausse attribuable en partie à la baisse du dollar canadien par rapport à la devise japonaise. La baisse des prix du blé (-2%) a compensé en partie ces augmentations. Les prévisions de récoltes de blé abondantes aux États-Unis ont aussi entraîné une baisse des prix du blé canadien.

Precious metal prices increased in March due greatly to the lower value of the U.S. dollar against the Japanese yen and the German mark, and the resistance against increasing U.S. interest rates. Gold prices increased 3% in March but were only 2% higher than 12 months earlier. Platinum prices were up more than 3% in March and up almost 8% over the earlier 9 months. Palladium, which is mined as a by-product of platinum has surged to a six-year high. Prospects for increased industrial use in automobile catalytic converters, dental alloys, and electronics have led to higher palladium prices. Also in March, higher prices for copper (+5%) and zinc (+3%) were virtually offset by lower prices for aluminum materials (-6%) and nickel concentrates (-10%).

Les prix des métaux précieux ont grimpé en mars surtout en raison de la valeur diminuée de la devise américaine par rapport au yen japonais et au mark allemand et du refus des autorités américaines d'augmenter leurs taux d'intérêt. Les prix de l'or ont augmenté de 3% en mars, mais étaient supérieurs de 2% seulement aux prix de l'or à la même période l'an dernier. Les prix du platine ont augmenté de plus de 3% en mars et de près de 8% au cours des neuf derniers mois. Le palladium, sous-produit du platine, a atteint un sommet de six ans. Le fait qu'on pourrait éventuellement se servir du palladium dans les convertisseurs catalytiques des voitures, les alliages dentaires et les produits électroniques explique la hausse des prix. De plus, en mars, l'augmentation des prix du cuivre (+5%) et du zinc (+3%) a neutralisé, à toutes fins utiles, la baisse de l'aluminium (-6%) et des concentrés du nickel (-10%).

In March, ferrous material prices declined 1% from February, caused by lower iron and steel scrap prices (-3%). Overall, in the latest 12 months, ferrous material prices were up 3%, almost completely due to higher iron ore prices (+5%).

En mars, les prix des matières ferreuses ont fléchi de 1% par rapport à février, en raison d'une baisse des prix du fer et de la ferraille d'acier (-3%). Globalement, au cours des douze derniers mois, les prix des matières ferreuses ont augmenté de 3%, en raison principalement de la hausse des prix du minerai de fer (+5%).

NOTE TO USERS

The raw materials price index reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Also, unlike the industrial product price index, the RMPI includes goods that are not produced in Canada.

NOTE AUX UTILISATEURS

L'indice des prix des matières brutes est représentatif du prix que les fabricants canadiens paient pour les principales matières brutes. Un grand nombre de ces prix sont fixés sur les marchés mondiaux. De plus, contrairement à l'indice des prix des produits industriels, l'IPMB inclut des biens qui ne sont pas produits au Canada.

	Non-ferrous metals – Métaux non ferreux	147.2	146.9	0.2	1.0	39.4
	Non metallic minerals – Minéraux non métalliques	103.4	103.2	0.2	1.7	0.6
	Mineral fuels – Combustibles minéraux	111.7	110.8	0.8	6.8	31.4

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.
(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'Indice total – Tous les produits devra être considéré comme celui qui fait autorité, et l'Indice total – Toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

TABLEAU 4. Indices des prix des produits industriels par étape de transformation

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$ indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

$\sum_i$ signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 $.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 $.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in 1986;
$P_{t/o}^{i}$	is the price index for element i, meaning its price change from the base period o to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;
w^i	est la valeur de transaction de l'élément i en 1986;
$P_{t/o}^{i}$	est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;
Σ_i	indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios),and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprend les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialities. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please, contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/ Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec l'Unité de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Bernard Lupien (613-951-9605).

Identify Emerging Trends

Define New Markets

Pinpoint Profit Opportunities

To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the ***Market Research Handbook*** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
- the level of sales in retail chain and department stores;
- what goods are being traded between Canada, U.S., and other countries;
- census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration

...and much, much more!

With over 600 pages, the ***Handbook*** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the ***Market Research Handbook*** (Catalogue #63-2240XPB) today for only $110 in Canada plus $7.70 GST, US$132 in the United States, and US$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 **OR FAX** (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication.

Dégagez les nouvelles tendances

Définissez les nouveaux marchés

Déterminez les possibilités de profit

Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le ***Recueil statistique des études de marché*** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
- le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
- les biens échangés entre le Canada, les É.-U. et d'autres pays;
- les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale

...et bien plus encore!

Le ***Recueil***, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du ***Recueil statistique des études de marché*** (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 $ au Canada plus 7,70 $ de TPS, 132 $ US aux États-Unis et 154 $ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication.

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture -- only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistic Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely-acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the ***Canadian Economic Observer*** gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts – names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual **Historical Statistical Supplement** – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the ***Canadian Economic Observer*** today.

The ***Canadian Economic Observer*** (catalogue no. 10-2300XPB) is $220 annually in Canada, US$260 in the United States and US$310 in other countries. Highlights of the ***Canadian Composite Leading Indicator*** (catalogue no. 11F0008XFE) are available by fax – the same day of release – for $70 annually in Canada and US$70 in the United States.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'**aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, ***L'Observateur économique canadien*** vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du **Supplément statistique historique** annuel à titre gracieux.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à ***L'Observateur économique canadien*** dès aujourd'hui.

Le prix de l'abonnement annuel à ***L'Observateur économique canadien*** (n° 10-2300XPB au catalogue) est de 220 $ au Canada, de 260 $ US aux États-Unis et de 310 $ US dans les autres pays. Les faits saillants de l'***Indicateur composite avancé*** (n° 11F0008XFF au catalogue) sont offerts par télécopieur – le jour même de leur parution – pour 70 $ par année au Canada et 70 $ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Client Services Unit,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 Telephone: (1-613-951-3350) or to the Statistics Canada reference centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Sous-section du service à la clientèle,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 téléphone: (1-613-951-3350) ou au centre de consultation de Statistique Canada à:

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

HIGHLIGHTS

Industrial Product Price Index

Canadian manufacturers' prices edged down in April. An increase in the value of the Canadian dollar reduced the value of export prices quoted in US dollars. This, combined with declines in lumber, aluminum and copper prices, more than offset increases in pulp, paper and petroleum product prices.

Industrial prices declined 0.2% in April from their level in March. The twelve-month change in industrial prices dropped to 8.9% in April from March's 9.5%. In January, the 12-month change had reached a 14 year peak of 10%.

The value of the U.S. dollar declined 3% against the Canadian dollar between March 15 and April 15. Manufacturers selling goods priced in US dollars received fewer Canadian dollars for their products. This accounted for most of the 1.9% decline in the price level of autos, trucks and other transport equipment. It also affected exporters of lumber, pulp, paper, and non-ferrous metal products. The appreciation of the Canadian dollar reduced the April change in industrial prices from 0.4% (excluding the exchange rate effect) to -0.2%.

In April, lumber prices fell a further 2.4% as residential construction in Canada and the United States remained weak. The exchange rate movement accounted for about a third of the decline. Lumber prices dropped across the country, except on the coast of British Columbia. The price level there was supported by British Columbian western red cedar which rose almost 6% in price.

Prices remained weak for the major non-ferrous primary metal products. Aluminum product prices dropped a further 4.2%. Copper and copper alloy product prices fell by 3.2%. Nickel product prices, which fell over 16% between January and March, were little changed in April, edging up 0.8%. Poor auto sales, low residential construction, and the size of metal inventories all contributed to these changes.

FAITS SAILLANTS

Indice des prix des produits industriels

Les prix des fabricants canadiens fléchissent en avril. L'appréciation de la valeur du dollar canadien réduit le montant des prix à l'exportation cités en dollars américains. Conjuguée à des baisses des prix du bois de construction, de l'aluminium et du cuivre, cette réduction a été plus que suffisante pour neutraliser la hausse du prix de la pâte de bois, du papier et des produits du pétrole.

Les prix industriels reculent de 0,2% entre mars et avril. La variation sur 12 mois des prix industriels est de 8,9% en avril, comparativement à 9,5% en mars. En janvier, la variation sur 12 mois avait atteint son niveau le plus élevé des quatorze dernières années, soit 10%.

Le dollar américain a perdu 3% par rapport au dollar canadien entre le 15 mars et le 15 avril. Les fabricants vendant des produits dont le prix s'exprime en dollars américains ont touché moins de dollars canadiens pour leurs produits. C'est la cause principale de la diminution de 1,9% du niveau des prix des voitures, camions et autre matériel de transports. Ceci devait avoir aussi des répercussions pour les exportateurs de bois de construction, de pâte de bois, de papier et de produits de métaux non ferreux. L'appréciation du dollar canadien ramène de 0,4% (abstraction faite de l'effet du taux de change) à -0,2% la variation des prix industriels en avril.

En avril, le prix du bois de construction baisse une nouvelle fois (-2,4%), compte tenu de la faiblesse persistante de la construction résidentielle au Canada et aux États-Unis. Le mouvement du taux de change explique environ le tiers de ce recul. Le prix du bois de construction diminue dans tout le pays, sauf sur le littoral de la Colombie-Britannique où les prix du thuya géant de l'ouest ont augmenté de presque 6%.

Le prix des principaux produits de métaux non ferreux de première transformation fabriqués au Canada reste faible. Le prix des produits en aluminium diminue encore une fois (-4,2%). Le prix des produits de cuivre et d'alliages de cuivre recule de 3,2%. Le prix des produits de nickel, qui avait régressé de plus de 16% entre janvier et mars, reste sans grand changement en avril (+0,8%). La faiblesse des ventes d'automobiles, de la construction résidentielle et le niveau des stocks de métaux sont autant de facteurs qui ont contribué à ces changements.

The most significant source of price increase for industrial prices in the economy remained the paper and allied products sector. Pulp prices rose another 2.2% as strong North American and offshore demand confronted limited supply. Increases in the cost of inputs explained much of the increases for certain pulp products: 10.8% (+66% from a year earlier) for corrugated container board; 9.2% (+56%) for liner board; and 4.5% (+20%) for boxes, bags and other paper containers.

La principale cause de la majoration du prix des produits industriels dans l'économie canadienne demeure le secteur du papier et produits connexes. Le prix de la pâte de bois progresse de nouveau (+2,2%), sous l'effet combiné d'une vigoureuse demande en Amérique du Nord et à l'étranger et d'une offre limitée. Les augmentations du coût des facteurs de production expliquent une bonne partie des hausses: de 10,8% (+66% comparé à un an plus tôt) du prix du carton ondulé, de 9,2% (+56%) de celui du carton doublure et de 4,5% (+20%) de celui des boîtes, sacs et autres contenants en papier.

In April, prices for petroleum and coal products rose 1.7%. This sector was the second most important source of price increases for industrial prices. Low gasoline inventories contributed to the increase.

En avril, le prix des produits du pétrole et du charbon s'accroît de 1,7%. Ce secteur était la deuxième cause, en importance, de la croissance des prix industriels. Le faible niveau des stocks d'essence a contribué à cette augmentation.

The 12-month increase in Canada's industrial prices remained the highest amongst the members of the G7 group of industrialized nations. The increase was a little over 7 percentage points higher than in the United States and about 5 percentage points higher than in Germany and the United Kingdom. The different structure of the Canadian economy accounts for much of the difference in the rates of producer price changes. Canada produces and exports large quantities of certain key processed raw materials. These had benefitted from strong price increases as the world recovery proceeded during the last year.

Le Canada demeure au premier rang des pays industrialisés du G-7 pour l'augmentation sur 12 mois des prix industriels. L'augmentation dépasse d'un peu plus de 7 points celle observée aux États-Unis, et de 5 points environ celle relevée en Allemagne et au Royaume-Uni. La différence de structure de l'économie canadienne explique une bonne part de la différence des taux de variation des prix à la production. Le Canada produit et exporte de grandes quantités de certaines matières brutes transformées essentielles. Ces matières avaient profité de fortes augmentations de prix grâce à la reprise mondiale de l'année écoulée.

In April, the 12-month change in the prices received by consumer goods manufacturers was only about a half a percentage point higher than the 12-month change in the prices paid by consumers to retailers. The 12-month increase in consumer goods prices at the manufacturer level remained close to 3%. The 12-month change in the consumer price index for goods rose to 2.5% from 2.1%. (About half of what the consumer pays goes to manufacturers. The remainder is divided among retailers, wholesalers, indirect taxes, and transporters).

En avril, la variation sur 12 mois des prix reçus par les fabricants de biens de consommation canadiens n'a été que d'environ un demipoint supérieure à la variation sur 12 mois des prix payés par les consommateurs aux détaillants. L'augmentation sur 12 mois du prix des biens de consommation au niveau du fabricant demeure voisine de 3%. La variation sur 12 mois de l'indice des prix à la consommation pour les biens passe de 2,1% à 2,5%. (Environ la moitié de ce que le consommateur paie va aux fabricants. Le reste se répartit entre les détaillants, les grossistes, les impôts indirects et les transporteurs.)

Exports and manufacturing shipments declined in February and March as the North American automobile and residential construction industries remained weak. This clearly had a negative effect on the price movement of some important industrial products. Nevertheless, the world economy remains relatively strong. This has had positive effects on the price movements in other industries

Les exportations et les livraisons du secteur de la fabrication au Canada ont diminué en février et en mars, compte tenu de la faiblesse continue des branches nordaméricaines de l'automobile et de la construction résidentielle. Ceci a eu un effet négatif évident sur les mouvements du prix de certains importants produits industriels canadiens. Néanmoins, l'économie mondiale demeure relativement vigoureuse, ce qui a eu des effets positifs sur les mouvements des prix dans

(such as pulp and paper). There also continues to be a ripple effect as past price increases for primary metals and certain other processed raw materials (such as pulp) work their way deeper into the Canadian economy.

Domestically, consumers are uncertain and retail sales reflect this: sales declined throughout the first quarter of 1995. For April, the outlook on retail sales is unclear because department store sales were up, but the number of new motor vehicles sold was down. In the short term, world demand for Canadian products and the fluctuating exchange rate are likely to remain central to the movements of Canadian industrial prices.

d'autres branches, comme les pâtes et papiers. On observe encore un effet d'entraînement, car les majorations antérieures du prix des métaux de première transformation et de certaines autres matières brutes transformées, comme la pâte de bois, pénètrent plus profondément dans l'économie canadienne.

Au pays même, les consommateurs sont incertains. En effet, les ventes au détail ont diminué tout au long du premier trimestre et les perspectives des ventes au détail pour avril sont incertaines, car les ventes d'automobiles ont diminué, tandis que les ventes des grands magasins ont augmenté. À court terme, la demande mondiale des produits canadiens et les fluctuations du taux de change demeureront vraisemblablement les déterminants principaux des fluctuations des prix industriels canadiens.

NOTE TO USERS

The Industrial Product Price Index (IPPI) reflects prices producers receive as goods leave their plants. It does not reflect what consumers pay. Unlike the Consumer Price Index (CPI), the IPPI excludes indirect taxes and the costs (transportation, wholesale, and retail costs) that occur from the time a good leaves a plant until the final user takes possession.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. A rise or fall in the value of the Canadian dollar against the U.S. dollar therefore affects the IPPI. A 1.0% change in the value of the Canadian dollar against the U.S. dollar has been estimated to change the IPPI by about 0.2%.

NOTES AUX UTILISATEURS

L'indice des prix des produits industriels (IPPI) retrace les prix que les producteurs reçoivent au moment où les produits franchissent les portes de l'usine. Il ne retrace pas ce que le consommateur paie. Contrairement à l'indice des prix à la consommation (IPC), l'IPPI exclut les impôts indirects et tous les coûts (coûts du transport et du commerce de gros et de détail) qui surviennent lorsque le produit part de l'usine jusqu'au moment où l'utilisateur final en prend possession.

Les producteurs canadiens exportent beaucoup de biens. Ils vont souvent indiquer leurs prix en devises étrangères, en particulier dans le cas des véhicules automobiles, des pâtes de bois, du papier et des produits du bois. Les fluctuations de la valeur du dollar canadien par rapport à la devise américaine se répercuteront par conséquent sur l'IPPI. Une variation de 1,0% de la valeur du dollar canadien par rapport au dollar américain devrait, selon les estimations, se traduire par une variation d'environ 0,2% de l'IPPI.

HIGHLIGHTS

Raw Materials Price Index

The raw material 12-month price change dropped to 13.8% in April after remaining over 17% during the first quarter of 1995. In April, higher prices for crude oil and wood were greatly offset by lower prices for metals and animal and vegetable products. Raw material prices increased 0.8% from March to April.

Crude oil prices increased more than 5% in April and were up almost 25% over the last 12 months. Higher crude prices appear to be driven by greater demand for gasoline over the same period last year and the upward pressure on prices to replenish low gasoline inventories. The lower value of the Canadian dollar may trigger greater domestic gasoline consumption this summer as more Canadians decide to vacation in Canada. Similarly, more Americans will probably do the same and travel both at home and in Canada due to the lower value of the U.S. dollar against the Japanese yen and German mark. Higher gasoline prices have already been noted in April's consumer price index (the 12-month change was +8.9%).

Wood prices have increased more than 85% since the beginning of 1992. In April, spurred on by demand for pulp and paper products, wood prices continued upwards by more than 3%. Previously, wood prices were pushed up by higher lumber prices but the slowdown in the North American housing market has reduced lumber sales. Prices now appear to be on a downward trend. Weaker lumber sales have been replaced by a strong demand for pulp and paper products. Since the end of 1993, pulp prices have doubled and newsprint and paper products have increased almost 35%. Newspaper publishers, fueled by advertising demand are looking for ways to lower their input of newsprint. Some publishers for instance are reducing the width of their papers to reduce costs. The world demand for newsprint paper and the fact that current supply appears limited will keep prices up, at least in the near future.

Metal prices have been weakening since January. Ferrous material prices declined almost 4% over this period (January to April), led by lower iron ore prices in April (-2.3%) and lower iron and steel

FAITS SAILLANTS

Indice des prix des matières brutes

La variation de prix sur douze mois des matières premières baisse à 13,8% en avril, après avoir été au-dessus de 17% durant le premier trimestre de 1995. En avril, l'augmentation du prix du pétrole brut et du bois est compensée dans une large mesure par la diminution de celui des métaux et des substances animales et végétales. Le prix des matières brutes augmente de 0,8% de mars à avril.

Le prix du pétrole progresse de plus de 5% en avril, et de presque 25% au cours des douze derniers mois. La montée des prix du pétrole brut semble s'expliquer par le fait que la demande pour l'essence a augmenté par rapport à la période correspondante de l'année précédente et par la pression à la hausse sur les prix afin de reconstituer les inventaires d'essence. La dépréciation du dollar canadien devrait déclencher une augmentation de la consommation intérieure d'essence cet été, car plus de Canadiens décideront de passer leurs vacances au Canada. Un plus grand nombre d'Américains feront probablement de même et voyageront chez eux et au Canada en raison de la faiblesse du dollar US devant le yen japonais et le mark allemand. Les prix élevés pour l'essence ont déjà été remarqués dans la variation sur 12 mois de l'indice des prix à la consommation (+8,9%) en avril 1995.

Le prix du bois a augmenté de plus de 85% depuis le début de 1992. En avril, aiguillonné par la demande de produits des pâtes et papiers, le prix du bois poursuit sa progression et augmente de plus de 3%. Plus tôt, le prix du bois avait augmenté sous l'effet d'une majoration de celui du bois d'oeuvre. Le ralentissement du marché nord-américain de l'habitation a réduit les ventes de bois d'oeuvre et les prix semblent désormais avoir tendance à baisser. La faiblesse des ventes de bois d'oeuvre a fait place à une vigoureuse demande des produits des pâtes et papiers. Depuis la fin de 1993, le prix de la pâte a doublé, alors que celui du papier journal et des produits du papier a progressé de près de 35%. Les éditeurs de journaux, stimulés par la demande de publicité, cherchent des moyens de diminuer leur consommation de papier journal. Ainsi, certains éditeurs réduisent la largeur de leurs journaux pour comprimer les coûts. La demande mondiale de papier journal et la limitation apparente de l'offre actuelle empêcheront un repli des prix dans un avenir prochain.

Le prix des métaux a perdu de sa force depuis janvier. Le prix des matières ferreuses a diminué de près de 4% au cours de cette période, surtout dans le cas du minerai de fer (-2,3%) et des déchets de fer et d'acier (-5,3%), en avril.

scrap prices(-5.3%).Non-ferrous metal prices have decreased 6% over the 3 months ending in April; prices declined 2.4% in April. The slowdown in the construction and automobile industries resulted in lower demand for many metals. Copper, the most important metal, saw prices fall in February, recover in March, then fall by more than 5% in April. Even with the latest decline in prices since January, April prices were still significantly higher than 12 months earlier. Compared to 12 months ago, prices were up for copper (+53%), aluminum materials (+43%), lead (+26%) and nickel (more than 40% higher). Unless there is a resurgence in the construction and auto sectors, metal prices may weaken further.

Le prix des métaux non ferreux a chuté de 6% au cours des trois derniers mois. En avril, il recule de 2,4%. Le ralentissement dans les secteurs de la construction et de l'automobile a entraîné une diminution de la demande de nombreux métaux. Le prix du cuivre, le plus important des métaux, a chuté en février, s'est redressé en mars, puis a chuté de nouveau en avril, soit de plus de 5%. Malgré le dernier fléchissement des prix depuis janvier, les prix en avril restent nettement supérieurs que ceux d'il y a douze mois. Au cours des derniers douze mois, le cuivre a augmenté de 53%, l'aluminium, de 43%, le plomb, de 26% et le nickel, de plus de 40%. À moins d'une reprise dans les secteurs de la construction et de l'automobile, le prix des métaux pourrait tomber encore davantage.

In April, prices declined for cattle (-5%) and hogs (-8%). Over the 12 month period, prices have also fallen, cattle (-12%) and hogs (-17%). The overabundant supply of these animals and the high levels of red meat already in cold storage have depressed prices. In the animals and animal products group, higher prices for industrial milk (+8%) and fish (+10%) partly offset the lower prices for cattle and hogs over the last 12 months.

En avril, le prix des bovins diminue de 5%, et celui des porcs, de 8%. Au cours des derniers douze mois, les prix ont aussi diminué pour les bovins (-12%) et les porcs (-17%). La baisse des prix résulte de la surabondance de l'offre de ces animaux et des stocks élevés de viande rouge déjà en entreposage frigorifique. S'agissant du groupe des animaux et des substances animales, l'augmentation du prix du lait de transformation (+8%) et du poisson (+10%) a partiellement compensé la baisse de celui des bovins et des porcs au cours des douze derniers mois.

Vegetable product prices in April declined by more than 2%. This decline was led by lower prices for canola (-9.4%), sugar (-8%) and coffee; offset partly by corn (+4%). Over the last 12 months vegetable product prices were up more than 7%. Higher prices for rubber (+80%), coffee, sugar and raw tobacco were the main contributors to the 12-month increase. These increases were somewhat dampened by lower prices for potatoes (-25%), corn (-10%), soybeans and canola over the last 12 months. The canola commodity contract arranged through the Winnipeg Commodity Exchange is in the process of changing its delivery point from Vancouver to Saskatchewan. As well, beginning with the August contract, the exchange will allow for delivery of many more grades of canola at a greater number of delivery points. This process may create more openness in the canola market and thereby increase competitive pricing even further.

Le prix des substances végétales recule de plus de 2% en avril. La principale cause en est la diminution du prix du canola (-9,4%), du sucre (-8%) et du café, qui est partiellement compensée par l'augmentation de celui du maïs (+4%). Au cours des douze derniers mois, le prix des substances végétales a progressé de plus de 7%. La hausse du prix du caoutchouc (+80%), du café, du sucre et du tabac brut est la raison principale de l'augmentation sur douze mois. Ces majorations sont légèrement atténuées par la baisse du prix des pommes de terre (-25%), du maïs (-10%), du soja et du canola au cours des douze derniers mois. Le contrat sur marchandises de canola sous les auspices de la Bourse des marchandises de Winnipeg est en voie de transférer le point de livraison de Vancouver à la Saskatchewan. De même, à compter du contrat d'août, la Bourse permettra la livraison d'un bien plus grand nombre de catégories de canola à un nombre plus considérable de points de livraison. Ce processus pourrait amener une plus grande ouverture du marché du canola et rendre ainsi les prix plus concurrentiels.

NOTE TO USERS

The Raw Materials Price Index (RMPI) reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Also, unlike the Industrial Product Price Index, the RMPI includes goods that are not produced in Canada.

NOTE AUX UTILISATEURS

L'indice des prix des matières brutes est représentatif du prix que les fabricants canadiens paient pour les principales matières brutes. Un grand nombre de ces prix sont fixés sur les marchés mondiaux. De plus, contrairement à l'indice des prix des produits industriels, l'IPMB inclut des biens qui ne sont pas produits au Canada.

	Paper & paper products – Papier & produits connexes	148.9	146.0	2.0	8.4	36.2
	Printing & publishing – Impression & édition	166.5	163.9	1.6	5.4	19.7
	Primary metal products – Produits métalliques primaires	135.1	137.1	-1.5	-2.9	21.5
	Metal fabricated products – Semi-produits métalliques	126.4	126.1	0.2	1.7	7.8
	Machinery & equipment – Machines & matériel	125.6	125.9	-0.2	0.3	3.3
	Autos, trucks, other transp. eqp. – Voitures, camions & autres	119.6	121.9	-1.9	-1.5	2.2
	Elec. & communications prod. – Appareils élect. & de télécom.	118.1	118.1	0.0	0.4	3.4
	Non metallic mineral products – Produits minéraux non métallique	122.0	121.7	0.2	1.3	5.7
	Petroleum & coal products – Produits du pétrole & du charbon	96.2	94.6	1.7	1.6	11.5
	Chemicals, chemical products – Produits chimiques	138.0	136.8	0.9	1.8	14.4
	Misc. manufactured products – Produits manufacturiers divers	122.5	122.4	0.1	1.6	4.1
4	**Intermediate goods – Produits semi-finis**	**131.0**	**131.1**	**-0.1**	**1.3**	**13.0**
	First-stage intermediate goods – Produits semi-finis de première étape	145.8	145.6	0.1	1.7	29.8
	Second-stage intermediate goods – Produits semi-finis de deuxième étape	126.9	127.0	-0.1	1.3	8.6
	All finished goods – Tous les produits finis	**122.0**	**122.7**	**-0.6**	**0.0**	**2.7**
	Finished foods & feeds – Aliments de consommation et alim. pour anim.	122.6	123.0	-0.3	0.7	1.9
	Capital equipment – Matériel capitalisé	124.4	125.5	-0.9	-0.4	2.6
	All other finished goods – Tous autres produits finis	120.4	121.1	-0.6	-0.1	3.2
3	**All manufacturing industries(2) – Industries manufacturières(2): Gross weighted (80 SIC)(2) – Pondération brute (80 CTI)(2)**	**127.5**	**127.8**	**-0.2**	**0.9**	**8.9**
6	**Raw materials – Total – Ensemble des matières brutes**	**134.0**	**133.0**	**0.8**	**2.7**	**13.8**
	Raw materials – Total – Excl. mineral fuels – Ensemble des matières brutes, sauf combustibles minéraux	**141.9**	**142.8**	**-0.6**	**0.6**	**10.9**
	Vegetable products – Substances végétales	124.1	127.1	-2.4	0.7	7.2
	Animals & animal products – Animaux & substances animales	109.2	112.1	-2.6	0.0	-2.2
	Wood – Bois	230.5	223.5	3.1	6.4	15.9
	Ferrous material – Matières ferreuses	121.3	122.8	-1.2	-3.8	0.7
	Non-ferrous metals – Métaux non ferreux	143.9	147.5	-2.4	-5.9	36.9
	Non metallic minerals – Minéraux non métalliques	105.0	104.9	0.1	1.0	0.8
	Mineral fuels – Combustibles minéraux	116.9	111.7	4.7	8.6	22.2

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.
(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total – Tous les produits devra être considéré comme celui qui fait autorité, et l'indice total – Toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations

TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations de produits

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^{i}$ is the price index for element i, meaning its price change from the base period to time t;

Σ_i indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^{i}$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

Σ_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 $.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 $.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in 1986;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period o to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;
w^i	est la valeur de transaction de l'élément i en 1986;
$P_{t/o}^i$	est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;
Σ_i	indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios),and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprend les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialities. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please, contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/ Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec l'Unité de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Bernard Lupien (613-951-9605).

CANADA A PORTRAIT

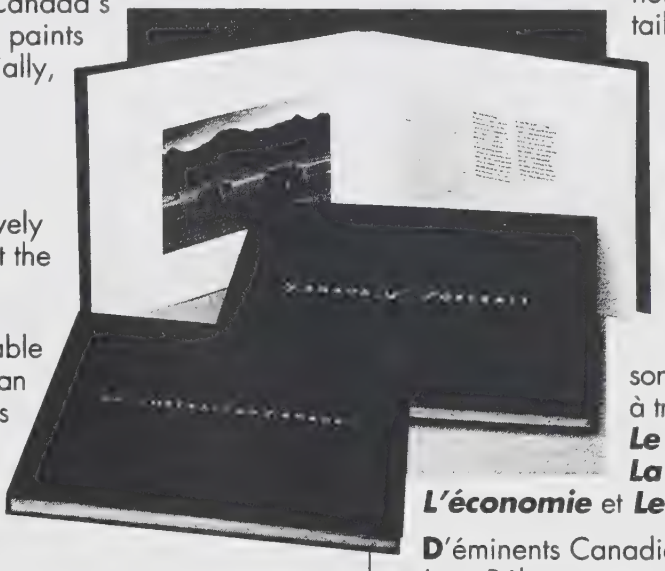

A CELEBRATION OF OUR GREAT NATION

UN PORTRAIT DU CANADA

POUR CÉLÉBRER LA GRANDEUR DE NOTRE PAYS

Canada challenges the imagination. Imagine a country where Newfoundlanders live closer to Africans than they do to fellow Canadians in British Columbia. Or a country with an island that has a glacier bigger than Ireland. Imagine a country with two million lakes, and the world's longest coastline – but that shares a border with only one nation.

Statistics Canada has created the 54th edition of ***Canada: A Portrait*** as a celebration of our great nation. Drawn from Statistics Canada's rich palette of national data, it paints a picture of where we are socially, economically, culturally and politically.

Over 60 unique and beautiful photographs combined with lively text, provide a close-up look at the Canada of today.

Experience this land's remarkable natural regions and diverse human landscape through six chapters entitled: ***This Land, The People, The Society, Arts and Leisure, The Economy,*** and ***Canada in the World.***

Eminent Canadians such as astronaut Roberta Bondar, former hockey star Jean Béliveau, and writer W.O. Mitchell have contributed their personal visions of Canada.

Canada: A Portrait is a beautiful illustration of the Canada of today.

Presented in a 30 cm X 23 cm (12 1/4" X 9") format, prestige hardcover, with over 200 pages, ***Canada: A Portrait*** (Catalogue No. 11-403E) is available in Canada for $38.00 plus GST, US $41.95 in the United States, and US $48.95 in other countries.

To order write **Statistics Canada, Publications Sales, Ottawa, Ontario, K1A 0T6** or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. For faster ordering call toll-free **1-800-267-6677** and use your VISA and MasterCard or fax your order to **(613) 951-1584.**

Le Canada est un pays qui défie l'imagination. Imaginez un pays où les Terre-Neuviens vivent plus près des Africains que de leurs compatriotes de la Colombie-Britannique. Un pays où se trouve une île sur laquelle s'étend un glacier plus grand que l'Irlande. Imaginez un pays qui compte 2 millions de lacs et le plus long littoral du monde, et pourtant un seul voisin.

Statistique Canada a créé la 54^{e} édition d'***Un portrait du Canada*** pour célébrer la grandeur de notre pays. C'est à partir du riche éventail de données nationales de Statistique Canada que l'on a brossé ce tableau de notre situation sociale, économique, culturelle et politique.

Plus de 60 magnifiques photos, mariées à un texte vivant, offrent une vision claire et détaillée de ce qu'est le Canada d'aujourd'hui.

Découvrez les splendides régions naturelles de ce pays, de même que son paysage humain des plus diversifiés, à travers six chapitres intitulés : ***Le territoire, La population, La société, Les arts et les loisirs, L'économie*** et ***Le Canada dans le monde.***

D'éminents Canadiens, tels Roberta Bondar, astronaute, Jean Béliveau, ancienne vedette de hockey, et W.O. Mitchell, écrivain, y font part de leur vision personnelle du Canada.

Un portrait du Canada... un magnifique ouvrage de collection qui décrit admirablement bien le Canada d'aujourd'hui.

Présenté dans un format de 30 cm sur 23 cm (12,25 po X 9 po), dans une couverture rigide de luxe et en plus de 200 pages, ***Un portrait du Canada*** (N^{o} 11-403F au catalogue) coûte 38 $ plus TPS au Canada, 41,95 $ US aux États-Unis et 48,95 $ US dans les autres pays.

Pour commander, écrivez à **Statistique Canada, Vente des publications, Ottawa (Ontario), K1A 0T6** ou communiquez avec le Centre régional de consultation de Statistique Canada le plus proche. La liste figure dans la publication. Pour commander plus rapidement, composez sans frais le **1-800-267-6677** et utilisez votre carte VISA ou MasterCard ou télécopiez votre commande au **(613) 951-1584**.

✔ Identify Emerging Trends

✔ Define New Markets

✔ Pinpoint Profit Opportunities

To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the ***Market Research Handbook*** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
- the level of sales in retail chain and department stores;
- what goods are being traded between Canada, U.S., and other countries;
- census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration

...and much, much more!

With over 600 pages, the ***Handbook*** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the ***Market Research Handbook*** (Catalogue #63-2240XPB) today for only $110 in Canada plus $7.70 GST, US$132 in the United States, and US$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 **OR FAX** (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication.

✔ Dégagez les nouvelles tendances

✔ Définissez les nouveaux marchés

✔ Déterminez les possibilités de profit

Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le ***Recueil statistique des études de marché*** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
- le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
- les biens échangés entre le Canada, les É.-U. et d'autres pays;
- les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale

...et bien plus encore!

Le ***Recueil***, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du ***Recueil statistique des études de marché*** (nº 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 $ au Canada plus 7,70 $ de TPS, 132 $ US aux États-Unis et 154 $ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication.
